### **III. Important Terms about China**

## **1. Harmony between man and nature (天人合一)**

Chinese civilization has always emphasized the unity of man and nature and respect for nature. We regard the universe as one. Man is not free from nature, let alone above nature, man lives in nature. Man and nature should live together in harmony. We will advance the Beautiful China Initiative and take a holistic and systematic approach to the conservation and improvement of mountains, waters, forests, farmlands, grasslands, and deserts. We will carry out coordinated industrial restructuring, pollution control, ecological conservation, and climate response, and we will promote concerted efforts to cut carbon emissions, reduce pollution, expand green development, and pursue economic growth. We will prioritize ecological protection, conserve resources and use them efficiently, and pursue green and low-carbon development.

## **2. One should strive continuously to strengthen himself (自强不息)**

Human society is always advancing through continuous innovation and creation. Chinese people believe that just as the celestial bodies never run out of energy to orbit, should we always strive to better ourselves. This is the essence of traditional Chinese culture as well as the spirit and strength for the Chinese nation to thrive and prosper. The 5,000-year history of Chinese civilization is a history of overcoming difficulties and forging ahead. In the new era, the Chinese people will continue to strive for a better life as always.

## **3. Broad-minded and care for all things and people(厚德载物)**

This term tells us that a human being should have broad mind to accommodate all things. Since ancient times, the Chinese nation has

been confidently and magnanimously carrying out inter-ethnic exchanges and cultural exchanges with foreign nations, so that Chinese civilization has been inclusive and sustaining. Today, we should maintain the diversity of civilizations of all nations, strengthen mutual exchanges and learn from each other. In the face of catastrophe, Chinese culture believes in transcending disputes and giving a helping hand. In the wake of COVID-19, China proposed the vision of a global community of health for all, fully leveraged its strengths, ensured stability of global anti-epidemic supply chains and actively advanced international cooperation in vaccines to contribute to the global fight against the virus.

#### **4. Have faith and promote good will (讲信修睦)**

The Chinese nation emphasizes integrity, advocates peace, and cherishes and is committed to creating a harmonious atmosphere. We will stand firmly on the right side of history and on the side of human progress. Dedicated to peace, development, cooperation, and mutual benefit, we will strive to safeguard world peace and development as we pursue our own development, and we will make greater contributions to world peace and development through our own development.

#### **5. Good-neighborliness (亲仁善邻)**

As an old Chinese saying goes: good-neighborliness is a national treasure. Since ancient times, the friendly Chinese people have hoped for peace in the world and have a friendly relationship with people of other countries. Acting on the principles of amity, sincerity, mutual benefit, and inclusiveness and the policy of forging friendships and partnerships with its neighbors, China strives to enhance friendly ties, mutual trust, and converging interests with its neighboring countries. China is ready to work with ASEAN member

States and other countries in the region to uphold peace, independence, development and inclusiveness, and resolutely practice open regionalism. Together, we will build a common homeland that enjoys peace, tranquility, prosperity, beautiful environment and friendship, and write a new chapter of regional cooperation and Asian vitalization.
